

Section: Narratives - Needs Assessment

Introduction

The findings of a recent study showed that there is a significant benefit to students who participate in out-of-school-time (OST) programs. In fact, the Return on Investment of Summer school Programs in Pennsylvania study determined that for every dollar invested in summer school programming for students there was a return of \$6.69 in potential benefits to students, including reduced rates for drop-outs, teen pregnancy, substance abuse, crime and delinquency ([Link PSAYDN.org](#)).

In accordance with the American Rescue Plan (ARP) Act and Pennsylvania Act 24 of 2021 (Act 24), the Pennsylvania Department of Education (PDE) will award approximately \$50,000,000 or one percent (1%) of Pennsylvania's ARP Elementary and Secondary School Education Relief (ESSER) State Reserve funds to support school districts, charter schools and cyber charter schools (collectively, LEAs) in the development and implementation of comprehensive after-school programs to address learning loss in response to the academic, social, emotional and mental health needs of students and subgroups of students impacted by COVID-19 public health emergency that supplement school programs and activities.

Act 24 requires that, when available, existing personnel shall be utilized by school districts, charter schools and cyber charter schools to staff programs and activities established with these grant funds.

Within 90 days of receipt of these allocations, school districts, charter schools and cyber charter schools must submit a three- part plan to PDE, that outlines the proposed use of the grant money, itemized by program and activity. This plan is part of a consolidated application that includes after-school programming, summer programming, and a comprehensive plan to address learning loss. The plan shall include:

- 1) A description of each program and activity
- 2) A narrative outlining the expected benefit of each program and activity
- 3) A budget for each program and activity detailing personnel and operating costs

PDE has developed the Accelerated Learning Toolkit, a significant cadre of resources and trainings, to support LEAs in the development of their plans. The Accelerated Learning Toolkit can be found [Link to Accelerated Learning Toolkit](#).

Section 1 - Needs Assessment: In this section, LEAs are asked to describe the impact of the pandemic on their students since March 2020.

Indicators of Impact

1. Describe how the LEA identified students for inclusion in a summer school program. Include a brief description of the indicators used in the decision-making process.

Based on Action Research conducted during the Spring of 2021 the District determined that the overall impact of Summer School programming was of limited usefulness. These sessions were not well attended and absence was frequent. The only group that consistently showed a

higher propensity to attend a Summer program were elementary students with known or suspected social and/or emotional difficulties. Thus our limited Summer School efforts will be on students in grades K through 5 who have shown a persistent problem adapting to face to face instruction. That is the basis on which students will be identified for this element of the Learning Loss remedial efforts

Section: Narratives - Summer School Program Questions

Summer School Program Questions: In this section, LEAs are asked to describe the activities they have designed to provide summer school programming for their students.

2. Identify the target student-group for the summer school program. Will the focus be on academic growth, social and emotional wellness, or some other factor to support student growth? For each group, provide specific strategies that were used or will be used to identify and measure impacts.

Student Group	Area of Focus	Number of Students Served	Provide specific strategies that were used or will be used to identify and measure impacts
Children with Disabilities	Emotional Wellness	25	We will utilize attendance data, discipline reports, parent conference summaries and teacher requests for possible evaluation to help identify the students who will be eligible for this program

3. Describe the evidence-based resources that will be used to support student growth during the summer school program.

We will utilize a highly individualized program that focuses on the student herself and provides her with a low (1:1 or 2:1) teacher student ratio during the summer programs. Work will focus on identifying school avoidance behaviors that take place at the home, on the bus and in the classroom. Wherever possible will include parents and, as appropriate, other members of the family as part of the solution. We are focused on helping the student feel more welcomed and loved withing the school environment

4. Describe the staff that will provide the summer school program (i.e., internal staff or outside resources).

Number of Staff Members	Internal/Outside Provider	Role

Number of Staff Members	Internal/Outside Provider	Role
10	Internal Provider	Teachers
15	Internal Provider	Paraprofessionals
1	Internal Provider	School Counselor

a. The LEA assures it understands it is responsible to offer the work to its internal employees prior to engaging outside entities.

b. The LEA assures it understands it is responsible to ensure that all summer school program staff hold the appropriate certifications for the program that is being delivered.

5. How will the LEA assess the success of the summer school program? Please identify the tool, frequency of use, and expected results.

Tool Used to Evaluate Success	Frequency of Use	Expected Results
Functional Behavioral Assessemnt or Similar	Monthly or as needed	We expect to see a 33% reduction in school avoidance behaviors before arrival at school and during transport to school. We expect to see a 50% reduction in maladaptive behaviors during the school day. And we expect to see at least a 33% increase in regular attendance and in the number of whole days completed.

6. How will the LEA engage families in the summer school program?

Families will be key members of the team that will identify what is causing the student's emotional wellness dysfunction and, in particular, what keeps them from being able to come and attend full and successful days in school. To the extent appropriate and practical,

recognizing that we are not family mental health practitioners, we will seek to make the families a part of the solution for each student.
